

LIFEVAC EUROPE LTD

- LifeVac is a **non-invasive**, portable airway clearance device.
- Interchangeable sized masks, clearly identified by colour coded rings.
- No risk of pushing the tongue or obstruction back in a panic situation.
- No risk of oral damage.
- Generates over 326mm Hg of suction, safely and effectively dislodging the obstruction.
- Can be used for full and partial obstructions.
- Saved many lives around the world from choking to death.
- **Only** airway clearance device with independent medical testing, peer reviewed medical publications, peer reviewed abstracts proving safety, effectiveness and lives saved.
- Comes in two different variations, Standard LifeVac Kit, and Wall mounted LifeVac Kit.
- LifeVac is FDA registered, MHRA registered as a class one medical device and CE accredited.
- Can be applied if someone is standing, sitting or laying down.

❖ Easy to hold handle for secure grip.

- Dysphagia affects 50-75% of care and nursing home residents.
- Dysphagia is the inability swallow foods or liquids correctly.
- People who have Dysphagia are at risk of choking.
- Choking is one of the leading causes of accidental death in adults over the age of 65.
- Someone who is a wheelchair user may not be able to receive the abdominal thrusts, greatly reducing their chances of survival.
- LifeVac is equipped in over 3950 care and nursing homes across the UK.

❖ Translucent bellows, makes it easy to identify if the obstruction enters this area.

96 lives saved!
